POSTEVENT REPORT

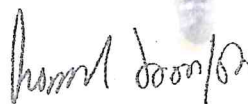

JARGON A BARRIER IN CASE HISTORY TAKING

Jargon is widely used in health care field, particularly in medical /dental records. Overzealous and unrepressed jargon use in diagnosis by dental professionals can obstruct effective communication between patients and peers. Communication barriers in health care setting have serious consequences for patient's health and safety. It is important to teach students about the importance of taking case history and creating a rapport with patients. To raise awareness of the value of case histories and how to minimise jargon-related miscommunications, IGIDS held a class on "jargon a barrier in case history taking."

A programme was organised in lecture hall 1 on 23/08/17 from 9:00-11:00am for third year students. Dr.Subramaniam R was chief orator for the day.

POST EVENT REPORT
CANCER AWARENESS

In India, the incidence of cancer is increasing rapidly; therefore, it is important to step up cancer literacy and knowledge amongst our students. Early diagnosis of oral cancer is considered to be the key factor in reducing the mortality and morbidity rates associated with it. It is crucial to educate dental students on the significance of early cancer detection.

An awareness talk and a quiz competition was organised in lecture hall 1 on 05/02/2018 at 9:00-10:00 am for second year students. Dr. Athira C.P. was the chief orator for the day.

TOBACCO ABUSE

World No Tobacco Day is observed on May 31 every year to highlight the risk associated with the use of tobacco. The annual campaign is an opportunity to raise awareness to help reduce use and protect the health of the people.

IGIDS in association with Indian Dental Association, Malanadu branch conducted a Public Campaign and Awareness program on "Tobacco abuse". Interns and students performed street play at different places between Perumbavoor and Kothamangalam on 31/05/18.

CBCT AND ITS APPLICATION IN DENTAL PRACTICE

The introduction of Cone Beam Computed Tomography (CBCT) devices, changed the way oral and maxillofacial radiology is practiced. CBCT was embraced into the dental settings very rapidly due to its compact size, low cost, low ionizing radiation exposure when compared to medical computed tomography. Teaching undergraduate students about Three-dimensional imaging (3D) is important since it has developed to meet the demands of advanced technologies in delivering the treatment and at the same time responsible for the evolution of new treatment strategies.

A program on "CBCT AND ITS APPLICATION IN DENTAL PRACTICE" was organised in lecture hall 1 on 20/02/18 from 11:00am-2:00 pm for fourth years. Dr. Haris PS was chief orator for the day.

POST EVENT REPORT

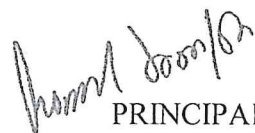

VISIT TO ST. JOHN'S SPECIAL SCHOOL

Children with disabilities and special needs are at greater risk for health problems, require extra help and rely on others to achieve and maintain good health. Oral health is no exception. A clean mouth is one of their most important health needs for life and will be influenced by your ability to provide necessary support. Child care providers who care for children with special needs are also responsible to take care of their mouth. Providers need to develop a special care plan and may need to seek professional guidance or obtain appropriate training in order to care for children with disabilities and special needs.

IGIDS conducted a dental treatment camp in St. John's special school on 25/05/2018.

POST EVENT REPORT

LASER DENTISTRY

Laser surgery is one of the latest advancements in dental science. Laser has many advantages over traditional surgical instruments. Dental laser surgery has also proven to be highly effective and pain-free. Looking to the future, it is expected that specific laser technologies will become essential components of contemporary dental practice over the next decade. IGIDS helps students to focus on personality and professional development by conducting classes on recent advancements in dentistry.

A programme was organised in lecture hall 1 on 21/03/18 at 10:00-12:00 pm for interns.

Dr. Mahesh Narayan was chief orator for the day.

POST EVENT REPORT

POTENTIALLY MALIGNANT DISORDERS OF ORAL CAVITY

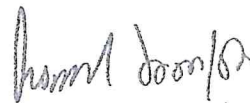

It has been well established by researchers that virtually all oral cancer are preceded by visible clinical changes in the oral mucosa usually in the form of white or red patch. Prevention and early detection of such potentially malignant disorders have the potential of not only decreasing the incidence but also in improving the survival of those who develop oral cancer. Lack of awareness about the signs, symptoms and risk factors, along with the absence of knowledge for early detection by health-care providers are believed to be responsible for the diagnostic delay in identifying the PMDs.

A programme was organised in lecture hall 1 on 13/12/17 at 9:00-11:00 am for third years.

Dr.Athira C P was the chief orator for the day.

The Academic Club in association with Department of Oral and Maxillofacial pathology had scheduled a program on 13th December 2017 at lecture hall 1 from 9:00am-11:00am. It has been well established by researchers that virtually all oral cancer are preceded by visible clinical changes in the oral mucosa usually in the form of white or red patch. Prevention and early detection of such potentially malignant disorders have the potential of not only decreasing the incidence but also in improving the survival of those who develop oral cancer.

Topic : Potentially malignant disorders of oral cavity

Venue: Lecture Hall 1

Time: 9:00am – 11:00 am.

Date: 13th December 2017

Speaker : Dr. Athira C

Program co-ordinator: Dr. Nivethitha

Chief Patron

Organising Chairman

ALL ARE INVITED

POST EVENT REPORT

PHOTOGRAPHY AND SOCIAL MEDIA

Photography and social media in dentistry has revolutionized the diagnosis, treatment planning, marketing, and communication between the patient, dentist, and dental laboratory technicians. With the advancements digital photography has implied in dentistry, the craftsmanship of the practitioners is touching new grounds for education, self-improvement, and documentation.

IGIDS conducted a programme on “PHOTOGRAPHY AND SOCIAL MEDIA” to broaden the knowledge of the technicality behind digital photography and how the same can be used in dentistry to make a standpoint for the practitioners in their field.

The programme was organised in lecture hall 1 on 13/06/18 at 10:00-11:00 am for interns.

Dr.Vighnesh Varma Raja was the chief orator for the day.
